

```
public class HierarchyAuthorizer implements Authorizer<RespectHierarchy> {  
    public Boolean authorize( AuthorizationContext ctx, RespectHierarchy rh ) {  
        Set<String> roles = ctx.subject("roles");  
        //retrieve other relevant information from ctx  
        return //hierarchy authorization logic;  
    }  
}
```
